

Cisco Webex Teams: A Comprehensive Cloud Collaboration Suite

A complete business collaboration service from the Cisco cloud that enables customers to message, meet, or call anyone, anywhere, at anytime

Message

Less email. More agility. Better teamwork. Communication starts with messaging. So does Cisco Webex Teams. Secure business messaging made simple.

Create a space for your team to send messages, share files, and stay in contact wherever you go.

Messages and updates from other applications appear in one place. Easily search for messages, files, and people. Moderation controls and end-to-end encryption keep work secure.

Meeting

Video everywhere. Screen share anything. It all works together.

Tap and it's a video meeting. Join from your phone or desktop. Or grab your team and meet in-person using the Webex Teams Room System in your conference room.

Add the sleek and easy to setup Cisco Webex Teams Board, the interactive smart screen with 4k camera and display which features:

- Automatic wake up - Recognize who you are, suggest activities to choose from
- Magic mics - Filter out noise, no table mics needed

- Auto-save whiteboards to appropriate Webex Teams
 - View & interact from Spark app or on any Webex Teams Board device
- Make a video call and share your screen from your Cisco Webex Teams app.

Video-enable any of your conference rooms by simply plugging in a Webex Teams Room System. Walk into the room with your Webex Teams app and your meeting is ready to go.

Call

Webex Teams integrates it all - main office, branch office, and even home office. Never miss a call. Your business phone is always in your pocket.

Answer from your Webex Teams app or your Cisco IP Phone. Callers will never know you weren't at your desk. Your contact list and call history is synced across all your devices.

When calling other Cisco Webex Teams users, easily transition from a phone call to a screen share on any device.

Integrate your existing phone system with Webex Teams Hybrid Services or setup a new phone by plugging it in and entering an activation code, it registers itself instantly.

¹ The Cisco Spark service doesn't include PSTN services. Customers need to purchase PSTN services from a 3rd party provider. For the complete Spark service, Cisco preferred media provider ecosystem partners can provide PSTN local, long-distance, and direct-inward-dial services. Existing Cisco UC customers will use Spark Hybrid Services to connect on-premises call capabilities to Cisco Spark capabilities in the cloud.
