

WHY HIRE AN INDIVIDUAL, WHEN YOU CAN HAVE AN ENTIRE TEAM?

TIP THE SCALE IN YOUR FAVOR

TRADITIONAL STAFFING COMPANY
- Unsupported IT Engineer on an Island

CONRES IT ON-DEMAND STAFFING
- Backed by 50 years of business acumen and technology experience
- 50+ Internally Staffed, Pre-Certified Engineers
- Average of 10 years' experience each
- Over 500 unique technical certifications
- 24/7 Network Operations and Call Center
- Managed Services Department
- Provide Day-to-Long Term Support
- National and Global reach

ConRes IT On-Demand staffing services not only places top-of-the-line talent, but provides full support throughout – backed by 50 years of tech know-how. The traditional staffing company just can't measure up.

PROVIDING A SOLUTION

When your budget is tighter than ever and your staff is stretched, time is your most precious asset and budget your biggest obstacle. It's hard to wring more from every minute and every dollar. But it is possible.

“What if you could scale your IT personnel requirements as you would your computing resources? Using a Workforce-as-a-Service (WaaS) model lets you add a skilled, vetted and insured workforce when you need it and release it when you don't.”¹

ConRes' IT On-Demand staffing services respect your time, protect your IT environment and solve a wide range of IT staffing needs. This Workforce-as-a-Service solution scales easily within your budgetary restrictions.

- Quickly scale IT personnel resources
- Quickly release resources when no longer required
- Quickly find and request personnel to fit the needs of your project
- Lower the cost of labor delivery
- Pre-screening guarantees the delivery of quality resources

- Add technology specialists for short-term projects
- Mitigate the risk of adding new teams or personnel
- Fill a need without having a huge upfront investment
- Increase productivity without taxing an already over-worked staff
- Reduce employee turnover

IT On-Demand staffing services include onsite, remote, short-term, long-term, temporary, and temporary-to-permanent solutions. You'll have the opportunity to interview potential staff to ensure a good fit while we handle all engagement details and sub-contractor paperwork for you.

PLACING CONTRACTORS IN IT SOLUTIONS, GLOBALLY

If you have offices outside of the United States, you can rely on ConRes' IT On-Demand WaaS solution to place engineers in positions across the globe. In the past year alone, we've placed hundreds of engineers nationally – from coast-to-coast, border-to-border and everywhere in between. In 2014, we put contractors to work in over 18 countries and with the help of our channel partners, you have access to IT staffing solutions in nearly 140+ countries.

STAFF YOU CAN RELY ON

Some of the staff augmentation solutions you can rely on include:

- Network
- Storage
- Systems
- Cloud Services
- Applications
- Security
- DC Moves/Adds/Changes
- Desktops
- Cabling

A PROVEN TRACK RECORD

As a \$400 million Value Added Reseller, our own sales reps trust us to provide IT personnel for multi-million dollar customer accounts. Because of that trust, we've placed several hundred specialists (in the past year alone) in projects for our reps' own clients.

Leverage the benefits of diverse project experience, over 50 years of technical know-how, experience filling in technical gaps, and proven track record of long-term relationships with the best names in information technology.

Knowledge, support and fast delivery helps your business operate at peak efficiency. Using a known, trusted expert allows your personnel resources to address key projects but also provides you assurance that projects will be completed according to your specific requirements. We give your business the same attention we give our own. This approach includes concern for business continuity and project completion within budget and on schedule.

CASE STUDIES

Expertise in multiple Operating Systems makes OS conversion a success:

A major finance company decided to convert from their existing Operating System (OS) to Linux. Since the client was only familiar with their current OS, they minimized their risk by employing solution engineers from ConRes to ensure data accessibility and prevent data loss during the switch-over. ConRes provided final project Transfer of Information (TOI) and in-house training to bring the client 'up to speed' as quickly as possible in their new processing environment.

Despite a last minute emergency, temporary placement results in uninterrupted service and identifies DR discrepancy:

Sue, a System Administrator of a high profile law firm, was in the 8th month of her pregnancy when her baby decided to join the world earlier than expected. ConRes was able to fill the gap with the needed administrative services (backup, DR testing, etc.) necessary to sustain the business without interruption. Disaster Recovery (DR) testing surfaced a discrepancy in the replication design. ConRes evaluated, provided recommendations, and implemented the suggested changes. The redundant data now adheres to the desired recovery requirements.

Technical expertise in LANDesk gets project completed on schedule:

Right in the middle of a LANDesk rollout project, a major retail company reduced their IT staff by 15% but couldn't afford any delays in the rollout project. The client required LANDesk expertise, but could not spare the cycles to train their remaining staff. ConRes placed a LANDesk certified engineer onsite for a few months and the LANDesk rollout was completed according to schedule.

ABOUT IT ON-DEMAND STAFFING FROM CONRES

IT On-Demand staffing is a sub-division of Continental Resources (ConRes), a \$400 million Value Added Reseller of IT solutions and services with worldwide headquarters in Bedford, Massachusetts. IT On-Demand specializes in serving business, government and academia – filling IT voids by engaging specialists specific to your industry and requirement. We offer services on a global-scale, to companies of all sizes looking for staff augmentation whether contracted, temporary-to-hire, or permanent placement solutions.

With over 50 years of high tech know-how, you can rely on our established partner relationships with the industries

top manufacturers. This depth of experience and long-term relationships stand behind your interactions with us, ensuring accurate solutions with the fastest possible response times.

Once a client, you also have access to our professional services team of over 50 seasoned system engineers and solution architects, over 560 unique technical certifications, and an around-the-clock Network Operations Center (NOC). This experience supports your solution, helping our engineers help you. We're small enough to be flexible, but we're large enough to handle any job; with our capabilities as multi-vendor, multi-solution specialists, we've done it all. It doesn't matter if it's a big job, lasting a few months or a small job, lasting only a few days... we'll be there. From network
