

# Take a Holistic Approach to the **Software-Defined Data Center** to More Effectively Meet Your Business Goals

## The Promises of the **Software-Defined Data Center (SDDC)**

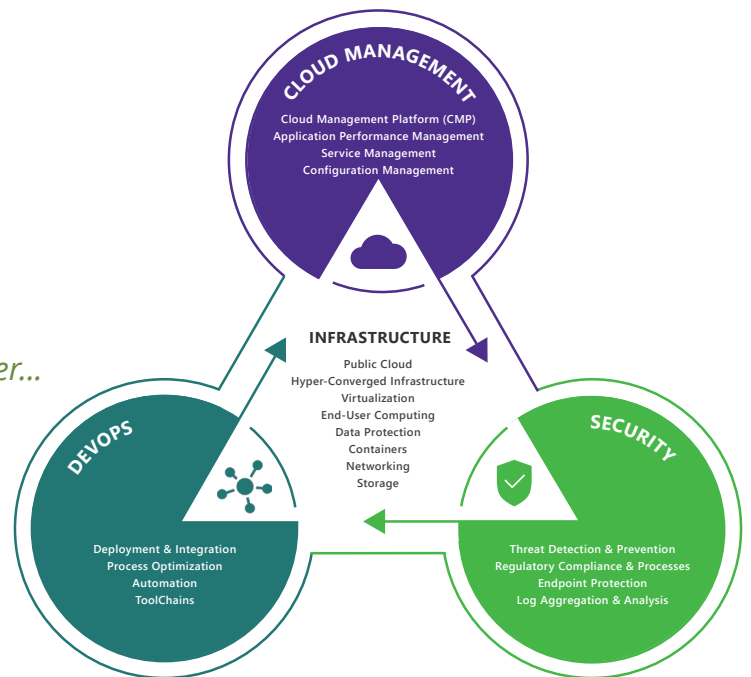

- **Increased** security
- **Greater** IT agility
- **Optimized** utilization of resources
- **Unified**, single-pane-of-glass visibility and control
- Hyperscale data center **growth**
- **Active/dynamic** delivery of resources and services
- **Seamless** interoperability of cloud environments (public, private and hybrid)

## How to Select the **Right** SDDC Solutions

ConRes has developed an SDDC Framework, as an approach to creating holistic technology, process, automation and orchestration solutions for our customers. Use this Framework to **discover, design, validate and implement** your SDDC ecosystem. By leveraging the Framework, we ensure every element of your infrastructure and services contributes to meeting the demands of your business.

### *How Your IT Infrastructure Components Work Together...*

- **Cloud management systems** impact the security paradigm
- **Application performance** management affects DevOps deployment and integration needs
- **Networking and security** are the glue bringing all elements together

**Connect with your ConRes representative today** to learn how our SDDC Framework can support the business goals of your enterprise.

# Why ConRes?

## Test, Configure and Validate Your SDDC Solutions Without Taxing Your Staff

We use our 48,000+ square foot Integration and Configuration facility to prove your IT infrastructure concepts, stage and configure data center environments and validate setups — without exposing your own IT environments or taxing your in-house resources. The Integration and Configuration Facility provides labs and configuration areas, warehouse space for inventory management, and manpower to meet your IT infrastructure configuration and integration requirements.

## Best-in-Class Experience

We are exceptionally knowledgeable — our engineering staff collectively hold more than 500 technology certifications in the following solution areas: Data Center, Digital Infrastructure, Security and Cloud.

## Industry-Leading Support

As a Hybrid IT<sup>SM</sup> Solution Provider, we're uniquely positioned as an expert across a breadth of solutions. Our portfolio rivals those of most large distributors, yet you will get the service and support of a dedicated local provider.

## Get the Financing You Need

50+ years of solid financial performance allows us to provide more flexible financing options to customers. We also offer consumption-based billing.

## Get the Resources **You Need** to be Self-Sufficient

Our goal is to educate your teams on new technology and make you self-sufficient. If you don't have the resources, we'll provide them!

## Certified **Women-Owned Business**

We are certified by the National Women's Business Enterprise National Council (WBENC) as a business that is woman-owned, operated and controlled.
