

#GetModern

Modern Infrastructure Assessment

Is your organization looking to reduce overall total cost of ownership and increase your business value? The importance of modern infrastructure is to increase efficiencies and drive business innovation.

ConRes, a Dell EMC Titanium Partner, has a way to help our customers adopt this. Through an infrastructure assessment, we can estimate what your infrastructure is costing today as far as: power/cooling, floor space, performance, data reduction and more. We can provide a report on what the TCO will be if you move to a modern infrastructure.

NOW IS THE TIME TO TRANSFORM YOUR IT

Modernize IT with hyper-converged, All-Flash and servers

Modernize your data center using hyper-converged — built on world-class servers and All-Flash storage — and leading data protection solutions. Reduce costs and accelerate your workloads so you can spend more time on innovation.

WHAT THE RESEARCH SHOWS ACHIEVING IT TRANSFORMATION LEADS TO:

The ConRes Difference

In a world of bits and bytes, where change is constant, we keep the human connection in business. We have the resources of a distributor, with the personal attention and flexibility you'd expect from a mom and pop store. After all, we are a private, women-owned, family business with 50+ years of financial stability. Our award winning technical talent sets us above our competitors. Our engineers average 18 years of experience, and our sales people on average have been with us for 15 years. We have dedicated account teams, meaning the people you interact with during the sales process are the folks you will interface with throughout our relationship. It's one of the reasons why our customer satisfaction rating is consistently rated 94% or higher. Give us a try, you won't truly understand the ConRes difference until you experience it first-hand!

This is a free assessment with no requirements to purchase. Our engineer will use a tool to understand your infrastructure today — storage, network and operational; then use that data to perform an analysis of what could be accomplished with a Modern Infrastructure solution. The Modern Infrastructure Assessment can identify potential areas of improvement and include performance, environmental reductions, simplified management and other operational and business impacts.

Schedule your assessment with us today!
